

Business Enterprise Information Services (BEIS)

Overview

The Business Enterprise Information Services (BEIS) provides an overarching solution to link existing disparate programs to establish an enhanced and enterprise-driven financial management capability. By leveraging the Department of Defense's (DoD's) current investment in information technology, BEIS will eliminate redundancy and facilitate reduction of solution costs for financial management operations. BEIS, as a suite of services, will support enterprise financial visibility goals by:

- Establishing the authoritative source for Standard Financial Information Structure (SFIS) values and providing for standardization by implementing SFIS and United States Standard General Ledger (USSGL) compliant financial reporting capabilities for Audited Financial Statements and Budgetary Reports;
- Providing an enterprise wide information environment that will serve as the single source for enterprise-wide financial information; and
- Providing decision makers with significantly greater access to financial information through data visibility and business intelligence.

The BEIS capabilities are organized into three distinct lines of business:

- Corporate Applications: BEIS will provide enterprise level capabilities in financial reporting, cash reporting and reconciliation, and general ledger;
- Reference Data Services: BEIS will establish a centralized repository for maintaining and using referential data to the DoD enterprise: SFIS Library data, Master Appropriation data, Corporate Electronic Funds Transfer (EFT) data, and the Transportation Global Edit Table data; and
- Enterprise Level Business Intelligence: BEIS provides data aggregation services, collecting selected transaction level data from DoD systems of record.

Program Mission

BEIS will build upon existing infrastructure to provide an enterprise-level suite of services. This suite of services is comprised of a core set of financial enterprise business capabilities to deliver timely, accurate, and reliable business information across the DoD in support of financial reporting.

Benefits

BEIS will provide DoD enterprise-wide financial visibility and will be used to support a wide variety of financial management activities to include:

- Departmental Audited Financial Statements
- Departmental Budgetary Reports
- Cash Accountability Reporting
- Fund Balance With Treasury Reconciliation
- SFIS Library Data
- Master Appropriation Data
- Corporate Electronic Fund Transfer Data
- Transportation Global Edit Table Data
- Enterprise Business Intelligence

Fast Facts:

BEIS

The Defense Business Systems Acquisition Executive (DBSAE) provides management oversight to BEIS. The DBSAE is responsible for driving the successful implementation of DoD systems and initiatives in support of the Department's Business Transformation goals. Its mission is to develop, coordinate, and integrate projects, programs, systems and initiatives providing DoD Enterprise-wide business capabilities to the warfighter.
